

application bar & application menu

The application bar provides a place to promote the most common tasks and views of the application. For less common tasks, applications can include a single menu launched from the application bar. An application menu is not required, but if you have one it is associated with the application bar.

APPLICATION BAR
Shown with icon buttons

APPLICATION BAR
Showing minimized state

APPLICATION MENU
Showing maximum viewable tasks in scrollable region

APPLICATION MENU
Showing menu sized for 3 overflow tasks
