

“The time needed to administer, follow up on tasks, and to check up on completed tasks has decreased thanks to Project Online

Matt Zaloba – IT Project Manager, e+CancerCare

e+CancerCare offers high-tech healthcare to patients in rural communities. Founded in 2002, it has 270 employees who work from 12 outpatient cancer care centers and 10 PET Imaging Centers located in eight states.

SITUATION

To streamline its frequent oncology software upgrades, the company sought a project management system. It adopted Microsoft Project Online to gain cloud-based project management capabilities.

BENEFITS

- ❖ Save up to U.S.\$50,000 on server investments costs
- ❖ Cut time engineers spend on administrative tasks
- ❖ Work flexibly with mobile access to project data
- ❖ Reduce project work variances and durations
