

# Intelligent compliance and risk management solutions

Microsoft 365 helps you assess compliance risks, govern and protect sensitive data, and effectively respond to regulatory requirements

#### Two challenges every organization, including **Microsoft, must face:**

- Exponential growth of data and the proliferation of insider risk
- Constantly evolving external regulations and standards

#### Information Protection and Governance

Protect and govern your data wherever it lives

Understand your data landscape: volume, scope, and location of your information. The first step to better protect your data is get your data out of the 'dark' and know where it lives

Detect and classify sensitive information types with Data Classification leveraged by machine learning

Automatically retain, delete, and store data and records in compliant manner

### **Compliance Management**

Simplify compliance and reduce risk

automatically detects implemented controls

step-by-step guidance í

CCPA

HIPPA

4

- FedRAMP • GDPR
- SOC
- and many more

>80% of data today is "dark"<sup>1</sup> ~53% of organizations have experienced an insider attack in the past year<sup>2</sup>

regulatory updates per day from 1,000 bodies worldwide <sup>3</sup>

200+

#### **Insider Risk Management**

Intelligently identify and take action on critical insider risks

Ensure the right people across security, HR, legal, privacy, and compliance are connected and equipped to promptly identify and act on insider threats

Obtain real-time updates on file activity,
communications sentiment, abnormal user behaviors and resignation dates

Identify hidden patterns and risks that traditional or manual methods might miss through configurable playbooks that use machine learning and intelligence

			Confidentiality Obligation

#### **Discover and Respond**

Investigate and respond with relevant data

Run content searches across mailboxes and sites in your Microsoft 365 organization. Review and redact content prior to export to help ensure that only the most relevant data is being shared, and that any business confidential pieces of that data are redacted

**Use eDiscovery Cases** to add members who can access the case, place a hold on content locations relevant to the case, associate multiple Content Searches with the case, and export the search results from the case burgered 29 strategies Catagories Catag
