

# Using the Microsoft 365 roadmap

This guide defines filters on the Microsoft 365 roadmap to help you interpret the data and provides information on how to share, follow, download, and provide feedback.

# Overview

With dozens of apps and features, it can be challenging to keep up with what's new and what's coming soon.

That's where the Microsoft 365 roadmap comes in.

The roadmap is the central location for IT professionals, business decision makers, and anyone else who's interested, to see what's coming.

It was created to help you plan, communicate changes, and take full advantage of your Microsoft 365 subscription.

# Search

Find features by typing in a product, keyword, or feature ID into the search bar.

## Search tips:

- The best way to find a specific feature is to search by its ID
- Tags can be used in search and are also filter options
- Keywords, such as "PowerShell", that might be found in the description can be used in search

The screenshot shows the Microsoft 365 Roadmap search results page. At the top, there is a navigation bar with the Microsoft logo, "Microsoft 365", and links for "Products", "Resources", "Support", and "Buy now". A search bar is located in the top right corner. The main heading is "Microsoft 365 roadmap" with a sub-heading: "Get the latest updates on our best-in-class productivity apps and intelligent cloud services. Rethink productivity, streamline business processes, and protect your business with Microsoft 365." Below this are three buttons: "Using this roadmap", "Roadmap improvements", and "See last added". A search bar is highlighted with a red box, containing the text "Search for a product, release or specific update". Below the search bar, there are filters for "In development", "Rolling out", and "Launched", each with a checkbox. The results section shows a feature titled "SharePoint: Enable modern communication site experience on classic sites". The description states: "Using PowerShell, admins can now enable the modern communication site experience on any classic team site, including the root site." Below the description is a "More info" section with a red box around the text "Feature ID: 65224". Other information includes "Added to Roadmap: 3/1/2019" and "Last Modified: 7/2/2020". A red box highlights the tags: "Tags: General Availability, Targeted Release (Entire Organization), All environments, GCC High, DoD, Germany, GCC, Worldwide (Standard Multi-Tenant), SharePoint, Education".

### SharePoint: Enable modern communication site experience on classic sites

Using PowerShell, admins can now enable the modern communication site experience on any classic team site, including the root site.

[More info](#)

Feature ID: 65224

Added to Roadmap: 3/1/2019

Last Modified: 7/2/2020

Tags: General Availability, Targeted Release (Entire Organization), All environments, GCC High, DoD, Germany, GCC, Worldwide (Standard Multi-Tenant), SharePoint, Education

# Filters

## Status

Each feature is assigned a status, which is updated over the lifecycle of the feature.

The statuses of “In development,” “Rolling out,” and “Launched” can be selected above the features.

Showing 882 updates<sup>1</sup>: [Download](#) [Share](#) [RSS](#)

**In development**  **310** **Rolling out**  **194** **Launched**  **378**

Description	Status	Tags	Release
SharePoint: Enable modern communication site experience on classic sites	Launched	SharePoint Education GCC Germany	July CY2020

Here’s how we define each of these statuses:

Status	Description
In development	The feature is currently in development and testing, and is not available to customers
Rolling out	The feature is beginning to roll out to the <i>first</i> applicable customers and is not yet available to <i>all</i> applicable customers
Launched	The feature is available to all applicable customers

# Filters

## Product(s)

A list of products within Microsoft 365 is provided in alphabetical order.

If multiple products are selected, results will show any features tagged with product 1 OR product 2 and so on.

The screenshot shows a 'Filters' panel on the left with a 'Products' section. The 'Products' section is highlighted with a blue box and contains a list of products with checkboxes: Access, Azure Active Directory, Azure Information Protection, Bookings (checked), Compliance Score, Cortana, Delve, Excel (checked), Exchange, and Forms (checked). Above the table, a status bar indicates 'Showing 31 updates<sup>1</sup>: Bookings × Forms × Excel ×'. The table has columns for 'Description', 'Status', 'Tags', and 'Release'. The first row shows 'Power BI: Excel data types from Power BI' in 'In development' status, with tags 'Monthly Channel (Standard) Power BI GCC Excel Worldwide (Standard Multi-Tenant)' and a release date of 'Q2 CY2020'. Above the table, there are three filter categories: 'In development' (11 items), 'Rolling out' (16 items), and 'Launched' (4 items), each with a checkbox.

## Platform

Certain features will be tagged with one or more of the following platforms.

The screenshot displays the 'Filters' section on the left and the main update list on the right. The 'Platform' filter is expanded, showing a list of platforms with checkboxes: Developer, Windows Desktop, Android, iOS, Mac, Web, and Linux. The main content area shows 'Showing 882 updates<sup>1</sup>' and a filter for 'In development' with 310 updates. Below this, there is a '+' sign and a 'Description' section with the text 'SharePoint: Enable modern communication experience on classic sites'.

# Provide feedback

## Feedback button

To provide feedback about the site or existing roadmap items, use the feedback button:

The screenshot shows a product roadmap for 'Access' under 'Azure Active Directory'. It features three filter tabs: 'In development' (9 items), 'Rolling out' (5 items), and 'Launched' (6 items). Below the filters is a table with columns for Description, Status, Tags, and Release. A 'Feedback' button is highlighted in the bottom right corner of the table area.
