

# Set up your work profile

## A profile for each part of your life

### Create a work profile for all your work needs

In the new Microsoft Edge, set up different profiles for all you do. Profiles keep your browsing, passwords, favorites, and settings separate for a clean, productive work experience.

### Easily switch between profiles

Life and work have blended, and so has our browsing. Turn on Automatic profile switching for a helping hand. Edge will detect when you're trying to access a work site and, if you're in another profile, prompt you to switch to your work profile to open it. No need to reenter your credentials.

iOS

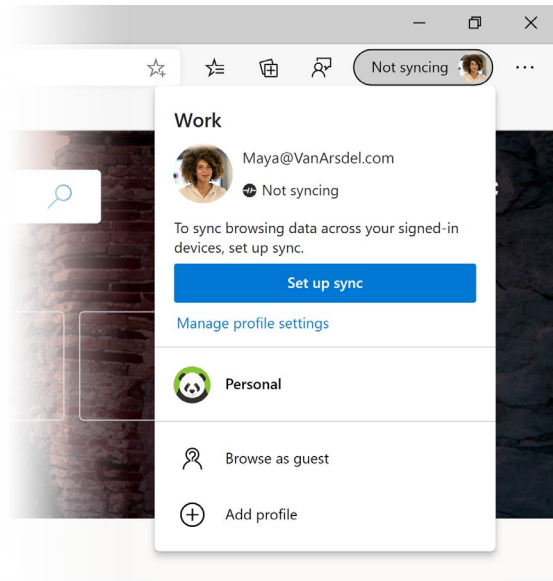

Take the Microsoft Edge experience with you on your mobile device!  
iPhone (iOS 14) users can now set Microsoft Edge as the default browser:  
*Settings > Edge > Default Browser App > Edge*

Android

# Set up your work profile

## A profile for each part of your life

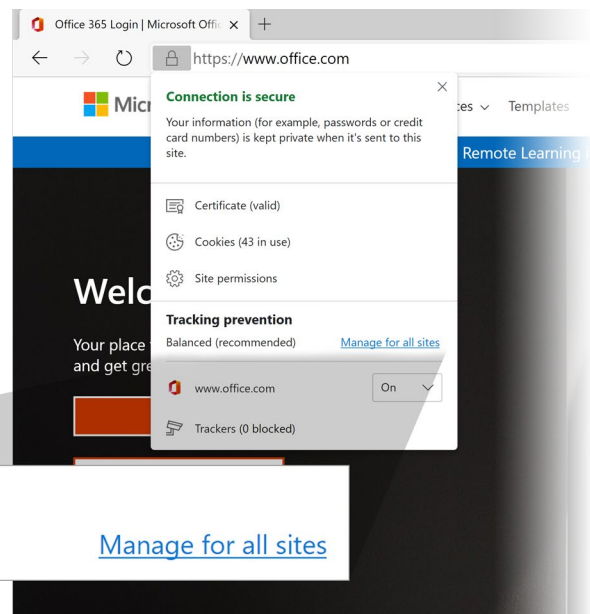

### Have what you need, wherever you're signed in

With sync, you can easily work from the devices you're signed into, with seamless access to passwords, favorites, settings, and more.

### More privacy with better controls

Click the lock icon in the address bar anytime you're browsing for a quick look into your privacy settings, including how sites may be tracking you around the web. Take control and set Tracking prevention to the level you're most comfortable with.

#### Tracking prevention

Balanced (recommended)
