

Founded in 1964, Cascades Canada produces, converts, and markets packaging and tissue products that are mainly composed of recycled fibers. It has almost 11,000 employees who work in production units in North America and Europe.

“With Project Online, we are able to continuously implement the right projects that align with Cascades business strategy and then execute those projects efficiently.”

Alain Simard,

Project Control Officer, Portfolio and Project Management,
Cascades Canada

SITUATION

Cascades wanted to provide its PMO with a centralized solution to encourage project management best practices and strategically approach its company-wide Project One Cascades initiative.

BENEFITS

- Fast deployment in the cloud
- Significant cost savings by managing and prioritizing new project execution
- Able to leverage existing investments around authentication
- Easy to take advantage of other assets such as Outlook, Skype for Business, and SharePoint Online

Project
