

With more than 20 years of experience in the air, Pegasus is a private airline in Turkey that offers customers affordable pricing and a knowledgeable crew. Pegasus aims to be the most on-time airline in the country, and it shares its monthly success rate on its website.

“With the workflows in Project Online, our PMO’s project sponsors, demand owners, and other managers stay informed of project status and can more easily manage the various steps throughout the life of the project.”

**Sibel Aydinli,**

Operational Excellence and Project Management Lead, Pegasus Airlines

## SITUATION

With a commitment to using technology to help provide outstanding customer services, Pegasus deployed Microsoft Project Online to improve its project portfolio management and find a cost-effective solution for project management.

## BENEFITS

- Improved process for creating and storing project documents and centralizing tasks and learnings
- Increased visibility to top-level management in all stages of company’s projects and initiatives
- Decreased operation costs due to interoperability with Office 365
